Software Design Project: Marking Scheme

This document explains how the final project is marked. The project is worth 50 marks in total.

Section	Criterion	Marks	Excellent	Adequate	Weak
Analysis	Use-case diagram covers all actors	6	All actors and use cases, correct notation (6)	Most actors, minor notation errors (4)	Missing actors or wrong notation (1)
	Requirements are testable	8	Every requirement has a measurable acceptance test (8)	Most requirements are testable (5)	Few requirements are testable (2)
Design	Class diagram matches the code	10	Diagram and code agree completely (10)	Small differences (6)	Diagram does not match the code (2)
	Design patterns are justified	6	Each pattern is explained with a reason (6)	Patterns named but not justified (3)	No patterns or wrong use (0)
Implementation	Working implementation	12	All features work in the demo (12)	Main features work (7)	Demo fails (2)
	Automated tests	8	Tests cover all main features and pass (8)	Some tests (4)	No tests (0)

Total: 50 marks

Rules

- The design document must be submitted as a single PDF file.
- The demo video must not be longer than five minutes.
- Every team member must present part of the demo.
